

*Alain Bouhet, Program Coordinator;
OROLIA*

Alain Bouhet has twenty years of high technology industry experience, including working in Automotive, Telecom, Defense and Aerospace sectors as an international project manager and an aviation design authority. Before joining OROLIA in 2008, he worked SIEMENS Automotive, CNES in European Space Port, Alcatel Lucent, and SAFT Batteries.

He is master's degree qualified with a broad technical skills base, with a background in RF/Microwave design and R&D Project Management.

Alain BOUHET is also the H2020 HELIOS and TAUCETI Program Coordinator for developing next generation of Distress Beacons for GALILEO/EGNOS E-GNSS and Search and Rescue applications, in Aviation and Maritime sectors.

Alain is an active member of International Working Groups such as International Cospas-Sarsat Programme, EUROCAE, RTCA and RTCM; several key standards have been published with his contribution. Currently he's a co-chair of the new EUROCAE WG98 sub group, where he takes care of developing and publishing a new aviation standard using the Galileo Return Link services.
