

Ewa Kadziolka, CEO & founder, Centrip

Ewa Kadziolka is a young and dynamic entrepreneur; CEO and Founder of Centrip with a background in Telecommunications. After receiving an MSc from Wroclaw University of Technology, she moved to gather experiences in a number of countries across Europe gaining expertise in various fields of Telecom Engineering, including involvement in system improvements for Galileo Second Generation (G2G).

After successful participation in 2017 edition of the European Satellite Navigation Competition, receiving the GSA 'EU at 60 – Space for Europe' Special Prize and becoming the 1st winner of E-GNSS Accelerator (a European Commission program), she moved to the Netherlands, founded the company and began Centrip's incubation in ESA BIC Noordwijk. Fascinated by space and space-related technologies, she is now focused on developing satellite navigation based products for accident prevention of at-risk people with an innovative approach of not trading individual freedom for security.
