

Marc Leminh, *Director Innovation & Strategy CLS*

Marc Leminh holds an MSc in engineering from the Ecole Centrale de Paris. He has spent all his career within the CLS group, in France and in the USA, at different positions and various locations. His work has always focused on technology (positioning, IoT, NewSpace...) with a strong customer orientation, bringing value to the end-users.

Some of his achievements include:

- Participating to the first French smallsat venture in the early 90s (it never made it to space);
- First geopositioning WEB platform to create from scratch one of the French telematics leaders with more than 50000 vehicles installed;
- Bringing innovation to CLS taking the best from New- and Old-Space
