

**Marco Nisi**, *Head of Integrated GNSS solutions;*  
*Sistematica S.p.A.*

**Marco Nisi** has a master degree in Aerospace Engineering attained in La Sapienza Rome and a post-graduate master's degree with highest honours in Advanced Navigation and Communication Satellite Systems achieved in Tor Vergata, Rome.

He's a project manager, system engineer and SW engineer with more than 10 years of experience in working in complex national and international environments. He managed several projects (in some cases till market uptake) exploiting GNSS as a key enabling technology for both, mass market and professional applications, with main focus in energy, security and aeronautics/maritime domains.

He's been a consultant for Thales Alenia Space Italy for more than 10 years, performing System Design and Risk Analysis activities related to Galileo System and PRS User Segment frameworks.

Marco is also an author of several press articles focusing on RPAS and GNSS.
