

**Xavier Banqué-Casanovas,**  
*Co-founder and CEO, Rokubun*

**Xavier** is a Space R&D Engineer and a Project Manager with over 10 years of experience. He holds a BSc in Telecommunication engineering and a Master of Research in Information and Communications Technology (MERIT) from the Polytechnic University of Catalonia, Spain. He has also recently completed a Master's Degree in Project Management in the Business Engineering School of University of La Salle (Spain).

Currently Xavier Banqué-Casanovas is working full time as a CEO and a Research Engineer at his co-founded company Rokubun S.L. Rokubun (name originating from the Japanese word for Sextant, 'Rokubungi') is an R&D company established in 2015. The company is led by two Telecommunication engineers with more than 25 years of aggregated experience in the fields of Navigation and Earth Observation based on Global Navigation Satellite System (GNSS). Rokubun focuses on research and development of accurate and affordable navigation solutions targeted to the mobile market. Its vision is to become a reference in precise navigation solutions in real life. Xavier also works as a Copernicus expert for the EU and as a mentor in the Copernicus Accelerator.

Prior to his current role, he has had diverse working experiences in Spain and the Netherlands, ranging from research on space-related topics to engineering and project managing.
