

EU Space Week Press Pack

The EU Space Week 2023, themed “Sustainable Innovation for a Resilient Europe”, is bringing together the entire EU Space community under one roof in Sevilla. From policymakers to industry, start-ups, public authorities, investors and users, it is the place to be for anyone interested in current and future trends of the EU Space Programme. For the first time, we include EU Space and Security, covering areas such as sustainable space traffic management and space assets for resilience.
