

# SPACEKNOW

Unlocking the Power of Data from Space

# Unique capabilities in three domains

## Economic Insights

Daily activity data on every industry observable from space. Near-real time, unbiased data represent the best possible input to economic forecasting and decision making.

### Typical customers

Financial Institutions, Hedge Funds, Governments, Large Corporations

## Custom Analytics

A wide range of custom analytics solution focused on object detection, land segmentation, activity monitoring, change detection, quantifications and other use cases.

### Typical customers

Governments, Private Companies in Construction, Oil & Gas, Mining Industries and more

## Defense & Intelligence

Automated, AI based solutions enabling defense & intelligence analysts to understand vast amounts of data with extreme speed and accuracy and make the right decision in support of military operations.

### Typical customers

Defense Forces, Military Intelligence, Satellite Centers, Space Agencies, Security Organisations

# The Problem

- Traditional economic indicators rely too heavily on past data...
- ...they are released weeks, months, or years apart
- ...they are of questionable accuracy in some cases
- ...there is a delay between the inflection in actual activity and inflections in data

Therefore, we believe funds, firms and governments need high-frequency and unbiased insight into what is happening on the ground in all possible industries.
